Purpose of the *Nursing Student Handbook*

This handbook, prepared for undergraduate students admitted to the nursing program, provides specific information about nursing that supplements – but does not replace – the Wesleyan College Catalogue or *The Wesleyanne* – Wesleyan’s student handbook. Unless otherwise indicated, policies and procedures for the Bachelor of Science in Nursing degree are the same as for the Bachelor of Arts. You are expected to read this handbook, abide by the policies, and be directed by its many features to help you be successful in the nursing major. You are asked to sign the statement in the back of this handbook, acknowledging you have read and understand it, and submit that page to become a part of your permanent record in the nursing division.

Every effort is made to ensure that each student is aware of and has access to the contents of this handbook. Each year the nursing student handbook is updated and reviewed to ensure consistency and accuracy.

The Faculty and Staff wish you an enjoyable and successful learning experience as you complete the nursing curriculum. We are excited that you have chosen Wesleyan for your nursing education! We are here to support you in your journey toward the profession of nursing.

~ The Wesleyan Nursing Faculty and Staff ~

Disclaimer

The Nursing Program reserves the right to alter contents of the Nursing Student Handbook with notice to students as necessary. Students will be notified of the change in a timely manner, given an electronic copy of the change, and must sign that they have received and understand the change.

Historical Background of the Nursing Program

Wesleyan College and the nursing program are accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), which is recognized by the United States Department of Education and the Council for Higher Education. The baccalaureate degree in nursing program at Wesleyan College is accredited by the Commission on Collegiate Nursing Education (www.aacn.nche.edu/ccne-accrreditation). The nursing program has full approval from the Georgia Board of Nursing, 237 Coliseum Dr., Macon, GA 31217-3858 (478-207-1640).

The pre-licensure BSN is a four-semester, upper division course of study that builds upon the general education curriculum with a strong focus in humanities and the social and biological sciences. Graduates may fulfill roles in management, leadership, and community health nursing. The nursing student will complete the general education core (35 semester hours), prerequisites for the major courses (15 semester hours), electives (0-10 semester hours), and the required nursing courses which total 60 hours. The minimum required hours for graduation equals 120 hours for the pre-licensure BSN. Graduates of the program will be prepared to take the national examination (NCLEX-RN) leading to licensure as a Registered Nurse (RN).

Mission: Wesleyan College is committed to women's education and helping every student find a unique voice and purpose. As the first college in the world chartered to grant degrees to women and shaped by Methodist values, Wesleyan provides students an academically challenging and relevant liberal arts education. Our diverse, inclusive community encourages creativity, innovation and leadership so all graduates are prepared to thrive in a complex world.

Guiding Principles:

Wesleyan's community is:

- **Academically challenging:** We believe students succeed when they are challenged academically. Wesleyan's dedicated faculty and staff offer individualized support to motivate students to achieve their potential.
- **Purposeful:** We believe students thrive when they have a purpose and a clear vision of their goals. Wesleyan helps students define these goals and strategically plan for the future.
- **Inclusive:** We believe all student voices are important. Wesleyan is diverse and inclusive, gaining strength from and celebrating the many ways we can learn from each other.
- **Connected:** We believe we gain strength from our connections to each other. Wesleyan encourages students to find their own places within a community and to contribute in meaningful ways.

Philosophy:

The statement of philosophy adopted by the nursing faculty is consistent with and supportive of the mission and philosophy of Wesleyan College. Curriculum and course sequence progress from simple to complex knowledge and skills with emphasis on holistic care and women's health. These concepts are implemented through the use and mastery of the components of the

nursing process. The nursing faculty believe that holistic care is based on an understanding and appreciation for diversity, including culture, customs, and language. This respect for individual uniqueness promotes advocacy, enhancement of social justice and ethical nursing care. These philosophical values provide the cornerstone for nursing and nursing education, promote learning, and are the basis for educational experiences.

This philosophy is threaded throughout the nursing program in the triad **Believe. Learn. Serve.** Belief forms the foundation for all action. **Believe** in yourself, believe in Wesleyan College, believe in humanity, and believe in excellence. The beliefs exemplify the holistic base of Wesleyan College and the commitment of each faculty member and student to embrace academic excellence.

The program also calls upon the student to **Learn.** Each student is viewed as an individual with unique learning strengths and needs. The faculty is committed to the development of a learning partnership with the student nurse. This partnership facilitates professional socialization and integration of nursing concepts of caring, holism and health. Learning is exemplified by change in thinking, feeling, and action.

Through the nursing program, the student is able to integrate the concepts of believe and learn to become prepared to **Serve.** Serving recognizes the commitment of the nursing profession to value social justice and respect each person. Service is deeply rooted in the historical development of the nursing profession. Health promotion, prevention, and care for others are the core of the nursing profession. Service may be provided locally or globally with clients of all ages and in diverse settings.

Curriculum:

The curriculum is conceptually based and founded on principles of adult and collaborative learning. The curriculum emphasizes deep learning about the discipline's most central concepts rather than content, which leads to the student's ability to develop habits of thought and pattern recognition. The student develops a deeper understanding of prevalent health care conditions and situations across the lifespan.

Educational Theory:

Wesleyan College Nursing faculty provide a learning environment built on educational theory that supports the nursing program's mission, addresses the needs of the students, accomplishes the program student learning outcomes, and meets the program outcomes. Program student learning outcomes refer to what the individual student will have accomplished by the end of the program. Program outcomes are the metrics for each graduating class which include the yearly NCLEX-RN[®] pass rate, the retention rate, the job placement rate, and graduate and employer satisfaction.

Faculty primarily apply two educational theories in their teaching for students to obtain the program student learning outcomes: cognitive learning theory and adult learning theory. Briefly, cognitive learning theory refers to an active, goal-oriented, meaningful learning environment.

As content is taught it relates to, and builds on, the learner's prior learning or cognitive frameworks. Learning builds, moving from simple concepts and thinking to higher order thinking applied to complex patient situations.

Adult learning theory addresses the characteristics of the student in the Wesleyan College Nursing Program. Aspects of adult learning theory used include the adult as a self-directed and problem-centered learner who needs and wants useful information that is readily adaptable to the learning situation. Adults prefer to be actively engaged in meaningful learning. These aspects of Adult Learning Theory support faculty's use of case studies, concept mapping, and problem-solving situations in the classroom and clinical environments as well as extensive use of high-fidelity human patient simulators to engage in simulated patient care.

Faculty also apply Dr. Patricia Benner's (Benner, Tanner, & Chesla, 2009) theory of Novice to Expert. Faculty understands novice learners are rule-driven. As they are challenged to apply critical thinking, they grow and are able to look at the bigger picture as they enter the stage of advanced beginner by completion of the program. Application of Benner's theory is helpful when teaching critical thinking and clinical reasoning.

Program Outcomes:

Program Outcome	Outcome Goal
<i>Completion Rate</i>	≥70% within three years of full-time enrollment in the nursing program
<i>Employment</i>	100% of those seeking employment
<i>1st time NCLEX pass rate</i>	≥80%
<i>Employer survey indicating satisfaction with graduates professional practice</i>	≥ 7/10 scale
<i>Of graduates responding, post-graduation survey indicating 80 % student self-report of appropriate preparation for practice</i>	≥ 7/10 scale

Program Student Learning Outcomes:

The program prepares the successful graduate to:

- I. Synthesize knowledge and content from the prerequisite core of science, mathematics, the liberal arts education (humanities, fine arts, modern foreign language and the social sciences) to the practice of professional nursing.
- II. Provide holistic care to clients of all ages in a variety of settings.

- III. Integrate evidenced-based practice (EBP) as the foundation for nursing interventions and care delivery.
- IV. Analyze issues that impact nursing, health and the global community.
- V. Synthesize concepts of leadership and management into the practice of nursing.
- VI. Integrate the role of the professional nurse with an awareness of self and a commitment to lifelong learning.

The program student learning outcomes of the nursing program are congruent with the American Nurses Association (ANA) the Code of Ethics for Nurses with Interpretive Statements (2015) and Standards of practice (2015), the Essentials of Baccalaureate Education for Professional Nursing Practice, and the Standards for Accreditation of Baccalaureate and Graduate Degree Nursing Programs of the American Association of Colleges of Nursing (AACN). The table below illustrates the connections between nursing program goals and outcomes and the BSN essentials.

Essentials of Baccalaureate Education (AACN, 2008)	Nursing Program Goals and Learning Outcomes
Essential I: Liberal Education for Baccalaureate Generalist Nursing Practice	I. Synthesize knowledge and content from the prerequisite core of science, mathematics, the liberal arts (humanities, fine arts, modern foreign language and the social sciences) to the practice of professional nursing
Essential V: Health Care Policy, Finance, and Regulatory Environments Essential VIII: Professionalism and Professional Values Essential IX: Baccalaureate Generalist Nursing Practice	II. Provide holistic care to clients of all ages in a variety of settings
Essential III: Scholarship for Evidence Based Practice Essential IV: Information Management and Application of Patient Care Technology Essential VI: Inter-professional Communication and Collaboration for Improving	III. Integrate evidenced-based practice (EBP) as the foundation for nursing interventions and care delivery

**The Essentials of Baccalaureate Education for Professional Nursing
Practice
American Association of Colleges of Nursing**

The Essentials of Baccalaureate Education for Professional Nursing Practice serve as a framework for the Wesleyan College nursing program curriculum.

Essential I: Liberal Education for Baccalaureate Generalist Nursing Practice

- A solid base in liberal education provides the cornerstone for the practice and education of nurses.

Essential II: Basic Organizational and Systems Leadership for Quality Care and Patient Safety

- Knowledge and skills in leadership, quality improvement, and patient safety are necessary to provide high quality health care.

Essential III: Scholarship for Evidence Based Practice

- Professional nursing practice is grounded in the translation of current evidence into one's practice.

Essential IV: Information Management and Application of Patient Care Technology

- Knowledge and skills in information management and patient care technology are critical in the delivery of quality patient care.

Essential V: Health Care Policy, Finance, and Regulatory Environments

- Healthcare policies, including financial and regulatory, directly and indirectly influence the nature and functioning of the healthcare system and thereby are important considerations in professional nursing practice.

Essential VI: Interprofessional Communication and Collaboration for Improving Patient Health Outcomes

- Communication and collaboration among healthcare professionals are critical to delivering high quality and safe patient care.

Essential VII: Clinical Prevention and Population Health

- Health promotion and disease prevention at the individual and population level are necessary to improve population health and are important components of baccalaureate generalist nursing practice.

Essential VIII: Professionalism and Professional Values

- Professionalism and the inherent values of altruism, autonomy, human dignity, integrity, and social justice are fundamental to the discipline of nursing.

Essential IX: Baccalaureate Generalist Nursing Practice

- The baccalaureate graduate nurse is prepared to practice with patients, including individuals, families, groups, communities, and populations across the lifespan and across the continuum of healthcare environments.
- The baccalaureate graduate understands and respects the variations of care, the increased complexity, and the increased use of healthcare resources inherent in caring for patients.

ANA Code of Ethics for Nursing American Nurses Association 2015

All professional nurses are expected to provide ethical care. The American Nurses Association (ANA) has identified the following ethical conduct for professional nurses. Students in the professional programs in nursing at Wesleyan are expected to follow these ethical guidelines in their clinical learning experiences and to incorporate them into practice as a RN in the future.

1. The nurse practices with compassion and respect for the inherent dignity, worth, and unique attributes of every person.
2. The nurse's primary commitment is to the patient, whether an individual, family, group, or population.
3. The nurse promotes, advocates for, and protects the rights, health, and safety of the patient.
4. The nurse has authority, accountability, and responsibility for nursing practice; makes decisions; and takes action consistent with the obligations to promote health and to provide optimum care.
5. The nurse owes the same duties to self as to others, including the responsibility to promote health and safety, preserve wholeness of character and integrity, maintain competence, and continue personal and professional growth.
6. The nurse through individual and collective effort, establishes, maintains, and improves the ethical environment of the work setting and conditions of employment that are conducive to safe, quality health care.
7. The nurse, in all roles and settings, advances the profession through research and scholarly inquiry, professional standards development, and the generation of both nursing and health policy.
8. The nurse collaborates with other health professionals and the public to protect human rights, promote health diplomacy, and reduce health disparities.
9. The profession of nursing, collectively through its professional organizations, must articulate nursing values, maintain the integrity of the profession, and integrate principles of social justice into nursing and health policy.

American Nurses Association, Code of Ethics for Nurses with Interpretive Statements, Washington, D.C.: American Nurses Publishing, 2015.

ANA Standards of Nursing Practice American Nurses Association 2015

The following standards guide the educational experience of students and the practice of both students and faculty at Wesleyan College.

Standards of Care

Standard 1: Assessment

The registered nurse collects pertinent data and information relative to the healthcare consumer's health or the situation.

Standard 2: Diagnosis

The registered nurse analyzes the assessment data to determine actual or potential diagnoses, problems, and issues.

Standard 3: Outcomes Identification

The registered nurse identifies expected outcomes for a plan individualized to the healthcare consumer or the situation.

Standard 4: Planning

The registered nurse develops a plan that prescribes strategies to attain expected, measurable outcomes.

Standard 5: Implementation

The registered nurse implements the identified plan.

Standard 5A: Coordination of Care

The registered nurse coordinates care delivery.

Standard 5B: Health Teaching and Health Promotion

The registered nurse employs strategies to promote health and a safe environment.

Standard 6: Evaluation

The registered nurse evaluates progress toward attainment of goals and outcomes.

Standards of Professional Performance

Standard 7: Ethics

The registered nurse practices ethically.

Standard 8: Culturally Congruent Practice

The registered nurse practices in a manner that is congruent with cultural diversity and inclusion principles.

Standard 9: Communication

The registered nurse communicates effectively in all areas of practice.

Standard 10: Collaboration

The registered nurse collaborates with healthcare consumer and other key stakeholders in the conduct of nursing practice.

Standard 11: Leadership

The registered nurse leads within the professional practice setting and the profession.

Standard 12: Education

The registered nurse seeks knowledge and competence that reflects current nursing practice and promotes futuristic thinking.

Standard 13: Evidence-based Practice and Research

The registered nurse integrates evidence and research findings into practice.

Standard 14: Quality of Practice

The registered nurse contributes to quality nursing practice.

Standard 15: Professional Practice Evaluation

The registered nurse evaluates one's own and others' nursing practice.

Standard 16: Resource Utilization

The registered nurse utilizes appropriate resources to plan, provide, and sustain evidence-based nursing services that are safe, effective, and fiscally responsible.

Standard 17: Environmental Health

The registered nurse practices in an environmentally safe and healthy manner.

Nursing Practice Performance Standards

Based on the core performance standards of the Southern Regional Education Board (SREB) Council on Collegiate Education, students who participate in the nursing program are required to demonstrate abilities and skills in cognitive, sensory, affective, and psychomotor performance. Each student should use these standards as an objective measure in deciding whether he/she is qualified to meet these requirements. Each standard is accompanied by examples of an activity that a student would be required to perform in the nursing education program.

Requirements	Standards	Examples (Not All-Inclusive)
Critical thinking	Critical thinking ability for effective clinical reasoning and clinical judgment consistent with level of educational preparation	Identification of cause/effect relationships in clinical situations Use of the scientific method in the development of patient care plans Evaluation of the effectiveness of nursing interventions
Professional Relationships	Interpersonal skills sufficient for professional interactions with a diverse population of individuals, families and groups	Establishment of rapport with patients/clients and colleagues Capacity to engage in successful conflict resolution Peer accountability
Communication	Communication adeptness sufficient for verbal and written professional interactions	Explanation of treatment procedures, initiation of health teaching. Documentation and interpretation of nursing actions and patient/client responses
Mobility	Physical abilities sufficient for movement from room to room and in small spaces	Movement about patient's room, work spaces and treatment areas Administration of rescue procedures-cardiopulmonary resuscitation
Motor skills	Gross and fine motor abilities	Calibration and use of

Requirements	Standards	Examples (Not All-Inclusive)
	sufficient for providing safe, effective nursing care	equipment Therapeutic positioning of patients
Hearing	Auditory ability sufficient for monitoring and assessing health needs	Ability to hear monitoring device alarm and other emergency signals Ability to discern auscultatory sounds and cries for help
Visual	Visual ability sufficient for observation and assessment necessary in patient care	Ability to observe patient's condition and responses to treatments
Tactile Sense	Tactile ability sufficient for physical assessment	Ability to palpitate in physical examinations and various therapeutic interventions

Adopted from SREB Council on Collegiate Education for Nursing,

NURSING POLICIES

Continuation and Progression

Part-time study:

Part-time study is not offered in the pre-licensure BSN track unless you are a nursing program re-entry student.

Progression:

- Nursing students must make at least a "C" (75%) grade in each nursing course which counts toward their degree.
- Grades of "D" and "F" are considered failure of the course.
- There is no rounding of grades in NUR courses.
- If a student earns a rating of clinically unsatisfactory in a clinical nursing course, a grade of "F" will be assigned for the course grade.
- Students are required to pass a clinical dosage calculation test with a score of 90 or higher in all courses in which the exam is administered.. Failure to score 90 or higher on a clinical dosage calculation test will prevent the student from progressing in the nursing program. If the test is given prior to the withdrawal deadline, the student cannot withdraw from the course without penalty. In this case, the student will receive a failing grade in the course and will not progress in the nursing program.
- Readmission (also referred to as re-entry) students who are unsuccessful any nursing course must write a letter of intent to the Nursing Program Director and be approved with a new program of study (see readmission).
- Students may repeat one nursing course. Any student failing two nursing courses will be denied continued enrollment in the Nursing Program.
- Any student who provides false information on the Nursing Program application regarding prior failures in another nursing program, or information regarding other health-care related licenses will be terminated from the program.
- Students who hold or who have held a license to practice vocational/practical nursing must show a current license to the program director. Students who hold or have ever held an encumbered, limited, or disciplined license may not be eligible to enter or continue in the program.
- Students are allowed to have 6 hours of required proficiency and general education classes outstanding to enter the nursing program. For a student to progress in the nursing program, these classes must be completed PRIOR to beginning the 3rd semester for fall admission cohorts and 4th semester for spring admission cohorts.

Students are expected to follow the nursing plan of study in the prescribed sequence to progress through the curriculum. Prerequisites for each course are noted on the appropriate course syllabus. Students who do not satisfy a minimum grade requirement in the nursing course or who withdraw from a nursing course will not be allowed to progress in the Nursing Program.

Readmission:

- Students who do not achieve a grade of "C" or higher in one nursing course will be allowed the opportunity to petition to take that course the next time it is offered, if space is available.
- A letter of intent to repeat the course explaining how the student will make changes that will allow her to be successful on her second course attempt must be submitted to the Program Director at least one semester before the course is offered.

- The student will receive notice in writing if space is available for the course in which she is reapplying after the previous semester has ended.
- The student will schedule with the Program Director to take a HESI exam appropriate for the semester in which she is reapplying. The student should obtain a conversion score of at least 75% to demonstrate sufficient knowledge of the content of concepts at the semester she is attempting to re-enter. This exam fee paid to the business office by the student to prior to the HESI exam administration.
- If re-entry is not in a medical-surgical class, the student will take and score at least a 90% on a level appropriate dosage calculation exam.
- A student will successfully demonstrate clinical skills for the semester in which she is applying for re-entry.
- The student will have to satisfactory complete the health requirements including a complete health history, current physical examination, current immunizations (measles, rubella, varicella, hepatitis B, and influenza), tuberculosis screening, urine drug screening, personal health insurance, current American Heart Association BLS certification taken at Wesleyan, and satisfactory results of criminal background check.
- A student who has attempted and/or failed the same nursing course twice or has failed two separate nursing courses will not be eligible to continue in the nursing major. The nursing faculty will discuss other options available to the student at Wesleyan College.

Withdrawals:

- **Students are encouraged to speak with their assigned nursing advisor and a financial aid representative prior to making the decision to withdraw from classes.**

Grade Appeals:

- Grade appeal process and deadlines are discussed in the Wesleyan College Catalogue.

Program Termination:

A Program Termination is defined as immediate dismissal from the Nursing Program. A student who demonstrates behavior deemed unacceptable to a clinical partner or unsafe behavior that results in serious consequences to a student, client, or others may be dismissed. The student will receive a clinical failure and a grade of “F” in the course. Depending on the infraction, a student who is terminated from the Nursing Program may not be eligible for readmission.

Classroom Policies

Attendance:

Attendance is mandatory for all nursing classes. See Attendance policy (Appendix B).

Classroom Behavior:

Students, faculty, and staff are expected to treat one another with respect in all interactions. In the classroom, rude, disruptive and/or disrespectful behaviors as determined by a faculty member interfere with other students' rights and with the instructor's ability to teach. Therefore, any student exhibiting unacceptable behaviors during a class will be asked to leave and will be counted absent for that class period. Failure to cooperate with this process will result in disciplinary action that may include withdrawal from the class or dismissal from the College. Violations will be reported to the Provost.

Examples, but not limited to: Late arrivals, interruption by cell phones, side conversations and unannounced early departures interrupt the flow of class and must be avoided.

Grading Policy:

Grading for each course is described in each course syllabus. It is the responsibility of each student to be knowledgeable of the course requirements and grading methods. There is no rounding of NUR grades.

Letter grades are computed as follows:

A	= 90 - 100
B	= 80 - 89
<u>C</u>	<u>= 75 - 79</u>

NOTE: The lowest passing grade in the Nursing (NUR) Major is a grade of "C" (75%) or higher.

D	= 66 - 74
F	= 65 & below

Students must achieve a weighted average grade of 75.00% or higher on exams in order to pass the course. Grades from other assignments will only be added if the student has an exam average of 75.00%. A weighted exam average of 74.99% will not be rounded to a 75.00%.

Clinical experiences are Pass/Fail. Students must pass both classroom and clinical to pass a course.

Testing:

Testing is an important part of nursing education. The terms test, exam, and quiz are used interchangeably. All Testing designed to measure your understanding of the material and to help prepare you for the National Council of State Boards of Nursing (NCSBN)-National Council Licensure Examination Registered Nurse NCLEX-RN. See Appendix A, for the full testing policy. **(Policy: T-1).**

Clinical Requirements

Nursing courses will require varied clinical practice opportunities throughout the program. These practice settings are located in and around Central Georgia and will be scheduled at various times, including nights, evenings and weekends. Students are notified each semester about the schedule and location of the clinical experience. Schedules may be changed by the faculty as necessary to assure a satisfactory experience. Laboratory experiences are considered part of the clinical requirements. Students must have their own transportation to the clinical practice settings. Prior to participating in any clinical experience, each student must provide the following:

- Annually: satisfactory completion of health requirements including a complete health history, current physical examination, current immunizations (measles, rubella, varicella, hepatitis B, and influenza), and tuberculosis screening. Failure to provide this evidence will result in exclusion from clinical sites and thus a clinical failure.
- Annually: urine drug screening
- Annually: Personal health insurance
- Annually: Satisfactory results of criminal background check. Background checks could result in denial to the clinical site and inability to begin and/ or continue nursing classes.
- The cost will be the responsibility of the student. Clinical practice requirements involve costs not covered by tuition, room, and board and will be the responsibility of the student.
- Current American Heart Association BLS certification taken at Wesleyan.
- The student must be free from any infectious and/or contagious diseases. Students must be fever-free for 24 hours prior to any clinical experience.
- Students who miss or anticipate missing a clinical experience due to a trauma, physical and/or mental health illness must submit a written health care provider release without any medical restrictions on physician letterhead or prescription sheet for return to clinical/laboratory experiences.

Accidental Injury- Health Insurance Coverage:

Neither the hospital nor college assume responsibility for an injury during clinical hours. The student is required to carry private medical coverage. The student should report any injury to the clinical instructor immediately.

Traditional students registered for 12 or more credit hours and all students living on campus will be automatically enrolled in the personal comprehensive health insurance plan and charged the premium on their tuition bill unless they show proof of other insurance and waive coverage under this plan. Clinical facilities do not assume responsibility for injury or illnesses of students.

Liability Insurance:

The college provides a limited liability policy for nursing students. The coverage for students is effective only during clinical instruction time. The student is **not** covered if employed outside of the clinical instruction time. The nursing student is encouraged to carry private liability insurance.

Laboratory Rules:

Failure to follow laboratory rules provided and posted will result in dismissal from lab and may result in a clinical failure.

- Enter the lab and begin working **ONLY** when instructed to do so.
- No photography, video, or audio recording in the lab.
- No use of cellular devices during learning experience (unless allowed by faculty)
- No personal computers (unless allowed by laboratory/ class faculty)
- No student may enter the storage closet.
- Eating and drinking is prohibited in the lab.
- No simulation items are to be ingested, administered, or used on any living being (human or other) at any time.
- All sharp items must be disposed of in the sharps containers throughout the lab; this includes needles, ampules, glass vials, and any item that could potentially break human skin.
- Clean up spills immediately. If you are unsure how to clean something up ask your instructor.
- Protective clothing is required. Sandals, shorts, and short skirts, are prohibited.
- Know the locations of all fire extinguishers, eyewash stations, and safety showers.
- Do not attempt to disconnect or reconnect any of the electronic devices; notify your instructor should you have concerns about any electronic device.
- Most importantly, use your common sense and ask if you have questions.

Expectations for Clinical / Laboratory:

- Attendance for Clinical, Simulation and Laboratory is imperative to your success. See **Appendix B**, for the full attendance policy.
- Students should review the course objectives and skills list prior to clinical.
- Students must provide transportation to clinical sites.
- Appropriate professional conduct and dress are required for each clinical and laboratory activity.
- Students practice in clinical areas under the direction and supervision of faculty, clinical instructors, and preceptors. No student may provide care without being directly supervised.
- Photocopying of client clinical/agency documents is prohibited.
- No smoking or vaping is allowed in a nursing area or during any clinical experience.
- Students are not allowed to have cell phones, cameras, or other items in the clinical area unless approved by faculty. In an emergency, family may notify the division of nursing office to contact the student.
- If the instructor suspects drug and / or alcohol abuse, student will be subject to drug and alcohol testing at the student's expense. If the testing is positive, the student will be subject to disciplinary action and may be dismissed from the program.
- Prior to leaving the clinical area, the student will complete all required documentation and give a report to the charge nurse and/or the nurse responsible for her patients.
- Patient Records and related printouts available in the clinical area are confidential information and are to be treated as such. Students are not permitted to copy or remove elements of the patient's medical record or related printouts (i.e. computer generated care

plan, medication administration record, etc.), even if the patient's name and MR number or other identifying data has been "blacked out" or "removed".

- Clinical conferences are essential parts of the clinical experience and professional behavior is expected during conferences. Students must be present and on time. Sleeping or even the appearance of sleeping is not allowed in clinical conferences.
- The nursing student is expected to demonstrate safe professional behavior in all laboratory and clinical experiences. A faculty member may remove a student from the laboratory or clinical practice experience if he/she demonstrates unsafe, unprofessional, unethical, and/or unlawful behaviors.

Illness, Injury or Exposure:

In case of illness, injury or body fluid exposure in the clinical area:

- The student is responsible to immediately notify the clinical instructor/faculty. The clinical instructor/ faculty will facilitate appropriate immediate care of the student. The clinical agency's policies and procedures will be followed.
- The student is responsible for any charges and has the right to refuse care. The clinical agency or Wesleyan College Nursing Program is NOT responsible for medical treatment costs incurred by students.
- An agency may require submission of a variance report according to agency policy, if appropriate. Student participation is required.

Uniforms:

The student official uniform must be purchased and worn as directed by faculty. The uniform includes the school patch on the left sleeve, a watch with a second hand, official name tag, white hose or socks and predominantly white shoes. Predominantly white is defined as 90% white with no bright/colorful logo or design. Safety and comfort should be considered when purchasing shoes. Shoes must be of solid leather- type design, have fully enclosed backs, and no open toes.

Uniforms are to be worn for all off-campus clinical experiences unless otherwise instructed. A white lab coat with a name tag must be worn over professional, business casual, clothes when going to the clinical facilities. Jeans, shorts, sneakers, sandals, or other extremely casual wear are not appropriate professional attire. The student is required to maintain professional appearance at all clinical sites.

Additional uniform notes include but are not limited to:

- Uniforms and shoes must be neat and clean.
- Excessive make-up, perfume, or other noticeable odors are not acceptable.
- No artificial eye lashes allowed.
- No nail polish, artificial nails including overlays, acrylics or gels may be used.
- Nails must be kept short, clean and not extend past the length of the finger.
- Hair must be neat, clean, a natural color and kept in a manner that does not violate medical asepsis.
- No gum chewing.
- No stethoscope covers allowed.
- Students must have protector eye glasses on their persons at all times in the clinical setting.
- Clinical agencies require tattoos and body art to be covered.
- One pair of small stud earring on ear lobes and a single wedding band without stones is allowed.
- The student must adhere to the clinical agency policies. If you need clarification consult your instructor prior to the clinical experience.

Other Nursing Program Policies

Academic Honesty Statement:

Students are expected to comply with the college's conduct code as outlined in the Wesleyan College Student Handbook. Students who violate the Conduct Code in any manner are subject to the disciplinary sanctions as listed in the student handbook.

In addition to the college sanctions, students who engage in academic dishonesty of any kind (including plagiarism) are subject to the following actions at the professional discretion of the nursing faculty:

1. Grade of zero for the assignment.
2. Written reprimand to be placed in student's academic file.
3. Clinical Warning or Failure depending upon seriousness of situation.
4. Termination from Nursing Program.

Please refer to the Student Handbook for information regarding due process and student's rights related to conduct violations and disciplinary sanctions.

Advisement:

The nursing faculty members serve as advisors to pre-nursing students as well as those currently enrolled in the program. Each student is assigned a faculty advisor. Each faculty member has scheduled office hours for academic counseling. Students may also request appointments for other times. Each student is responsible for seeing a nursing advisor to complete an advisement worksheet/plan and stay informed of the requirements for progression and graduation.

Appeals and Grievances:

For information on student rights and procedures related to appeals, grievances or complaints please refer to the Wesleyan College policies listed in the current *Wesleyan College Catalogue* and *Wesleyan College Student Handbook* available online.

Communications:

All students are required to maintain current and accessible phone numbers, mailing addresses, and college e-mail addresses and to notify the Nursing Program office of any changes. *Wesleyan college email is the only email used for communication.* Students are expected to check their Wesleyan email daily.

Patient Privacy:

The Wesleyan College Nursing students will interact with clients in various healthcare facilities. Wesleyan College is committed to insuring the privacy and confidentiality of all

clients in these facilities. In accordance with The Health Insurance Portability and Accountability Act of 1996 (HIPAA) Privacy and Security Rules and THE PRIVACY ACT OF 1974, all client interaction is considered private and confidential. Some actions are *strictly prohibited* and constitute violation of Federal Law and a breach of professional, ethical conduct:

DO NOT:

1. Copy or remove client specific information from a healthcare setting,
2. Record client interaction through the use of audio, video, or still photography
3. Discuss client information outside the clinical setting
4. Discuss client information with people in a clinical setting not involved in the care.

Any student found to have violated patient confidentiality as described by HIPAA or The Privacy Act of 1974 will be dismissed from the nursing program. For more information:

<http://www.hhs.gov/ocr/privacy/hipaa/understanding/summary/index.html>

<http://www.it.ojp.gov/default.aspx?area=privacy&page=1279#contentTop>

Performance Improvement Plan:

A student who does not consistently meet nursing policies, performance standards, and/or does not consistently follow program guidelines at any time during the nursing program will receive a Performance Improvement Plan (PIP). The purpose of the PIP is to inform the student that she is not meeting nursing policies, performance standards and/or program guidelines and to devise strategies for success in meeting the expected performance guideline. The performance improvement plan is utilized when the infraction is nursing specific and is not covered by the current disciplinary policies within the Wesleyan College Student Handbook.

Level I PIP is the first documentation of a student behavior that fails to meet nursing policies, expectations or performance standards; it consists of a summary of the concern with prescriptive measures necessary for meeting the nursing policies, expectations or performance standards. In essence, a Level I PIP is a verbal warning maintained in the student's nursing file.

Level II PIP is the second documentation of a student behavior that fails to meet nursing policies, expectations or performance standards. Failure to maintain a level II PIP improvement contract can lead to program dismissal.

- PIP will be determined by an agreement of the Nursing Faculty and any involved part-time clinical instructors.
- The clinical instructor/faculty will inform the student that her performance is not satisfactory and that she is to meet with the involved instructor(s) to discuss the PIP.
- The meeting time and date will be scheduled as soon as possible.
- The instructor/faculty will inform the student of the unsatisfactory behavior(s) the instructor observed, reported and/or the corresponding clinical outcome(s), nursing policy, expectation or performance standard not being met.
- The instructor/faculty may work with the student to write a plan to correct unsatisfactory behaviors and meet expected outcome. Specific dates, times, and/or performance standards must be listed.
- At the end of the conference, the instructors and student will review and sign the written PIP.

- The student will receive a copy of the PIP at the time of the meeting and a copy will be placed in the student's file.
- If the unsatisfactory behavior recurs in the same or subsequent semesters, the student will be placed on a level II PIP.

If a student does not satisfactorily complete all learning outcomes and/or activities of the PIP within the designated time frame(s), the student may fail the course resulting in a grade of “F” for the class. A student who fails clinical may not continue to attend clinical.

Social Networking:

We all use social networking sites. It is important to take precaution to maintain safety and privacy of self and others. Nursing students must be extremely careful not to divulge information about peers, faculty, patients, or other health care professionals. Any information posted about a patient or clinical facility is a violation of HIPAA and is grounds for dismissal from the program, as well as legal action by the patient or facility. Do not take or post pictures with any identifiable symbols of a clinical facility including the facility/ hospital badge. See **Appendix C** for the full social media policy.

Student Organization:

All nursing students belong to the Wesleyan College Student Nursing Association (WCSNA). Students are encouraged but not required to join the joint state and federal chapters of the Student Nursing Association. More information can be provided by a current WCSNA board member.

The student nursing association maintains its own bylaws.

Students Participation on Faculty Committees:

Representatives of the Wesleyan College Student Nursing Association Nursing board members represent students in the Nursing Division meetings. Students are invited to attend these meetings to participate in selected portions of the agenda (in order to preserve student privacy). Student representatives may observe and participate by offering the student perspective, by giving feedback during deliberations, and by conveying information to the nursing student body. Student representatives hold a non-voting seat.

Technology:

The nursing program uses an electronic platform for instruction, including some books, assignments, and testing. Each student must have a reliable laptop computer capable of running the required software.

Video Recording:

Students may be video-recorded as part of classroom or clinical instruction or during other Wesleyan College activities for educational or promotional purposes. Audio taping and/ or distribution of class activities are allowed at the discretion of the instructor.

Georgia Board of Nursing Information

Unlicensed students, in conjunction with faculty members and /or preceptors, are exempt from licensure during the practice of nursing that is an integral part of a curriculum in a nursing education program. Students, who are not otherwise licensed or certified, shall be employed only as unlicensed nursing personnel. They shall not represent themselves as nursing students nor assume responsibilities within the scope of practice of a registered nurse. Graduates, who are not otherwise licensed or certified, shall be employed only as unlicensed personnel prior to licensure. They shall not assume responsibilities within the scope of practice of a registered nurse. (GBON Rule 410-8-.08)

Application for licensure and taking the National Council Licensure Examination for Registered Nurses (NCLEX-RN) will be discussed during the last semester of the program. There are fees required for the NCLEX exam for state licensure. Fees vary annually.

The application for licensure contains a question regarding any arrest or conviction which must be answered honestly. Court documents will need to be obtained and sent with an explanation to the Board with the application. Permission to take the exam and/or be licensed in Georgia rests with the Georgia Board of Nursing.

The Georgia Board of Nursing requires criminal background checks for licensure and has the authority to refuse to grant a license to an applicant upon a finding by the board that the applicant has been convicted of any felony, crime involving moral turpitude, or crime violating a federal or state law relating to controlled substances or dangerous drugs in the courts of this state, any other state, territory, or country or in the courts of the United States, including, but not limited to a pleas of *nolo contendere* entered to the charge; or any licensing board or agency in Georgia or any other state denied the applicant's license application, renewal or reinstatement; or revoked, suspended, restricted, or prohibited the applicant's license, or requested or accepted surrender of the applicant's license, or reprimanded, fined or disciplined the applicant. If you have questions you may review these policies on the State of Georgia web site.

Appendix A

Policy T-1	Effective 8/14 Reviewed 8/17	Approval: Nursing Faculty
------------	---------------------------------	---------------------------

Subject: Testing Policy

Scope: All Wesleyan College Division of Nursing Students and Faculty

Purpose

This policy applies to Division of Nursing students and faculty who engage in any testing related activity. Wesleyan College Division of Nursing places emphasis on the Wesleyan College Honor Code. The Honor Code is the foundation upon which life in the Wesleyan College community is built. It is based upon the idea that individual freedom is a right founded upon responsibility. A student is expected to tell the truth, respect others and their property, and maintain academic integrity and honesty in all areas of College life. In Nursing, it is an individual responsible to maintain accountability for individual actions. When faced with decisions regarding testing and test security, maintaining the highest level of integrity is expected from both nursing faculty and students.

General Information

The words test, student assessment, quiz or examination are synonyms and may be used interchangeable by nursing faculty.

Nursing examinations increase in difficulty based on Bloom's cognitive levels. The increasing difficulty of items is designed to prepare the student to safely practice as a Registered Nurse upon successful completion of the national licensure examination (NCLEX-RN) upon graduation.

Explanation of Cognitive Levels:

Remembering (Knowledge): Can the student recall or remember the information?

Understanding (Comprehension): Can the student explain ideas or concepts?

Applying (Application): Can the student use the information in a new way?

Analyzing (Analyzing): Can the student distinguish between the different parts?

Evaluating (Synthesis): Can the student justify a stand or decision?

Creating (Evaluating): Can the students create new product or point of view?

Armstrong, P. (n.d.) Bloom's Taxonomy. Vanderbilt University: Center for Teaching. Retrieved from: <https://cft.vanderbilt.edu/guides-sub-pages/blooms-taxonomy/>. Retrieved on August 2, 2016.

Scale of Measure:

All tests are measured using the nursing grading scale listed below:

A = 90 - 100
B = 80 - 89
C = 75* -79
D = 66 - 74
F = 65 & below

* NOTE: The lowest passing grade in the Nursing (NUR) Major is a grade of “**C**” (75%) or higher. There is no rounding of NUR grades.

Policy

Procedure/Considerations

Emergencies:

- Students are required to attend all exams as scheduled unless a documented family or medical **emergency** arises.
- Student must contact the faculty or call the Nursing Division Office (478-757-5234) prior to the start of the exam if an emergency occurs; if no one answers, leave a clear, concise message.

Make-Up exams:

- Make-up exams may be administered at the discretion of the faculty and may be structured different from the original examination.
- Make up exams are given within three (3) business days of the original exam date unless the student is incapacitated, and only after the student has provided appropriate proof of said emergency.
- Repeating of exams is not permitted in the nursing program.

Prohibited Items:

- The following items are prohibited and may not be used during a test:
 - a. Mobile phones
 - b. Cameras
 - c. Audio recording devices
 - d. Smart watches or any wearable device capable of receiving messages
- Mobile phones, cameras, and video/audio recording devices are prohibited during a test and must be powered OFF. If you keep your phone inside your personal belongings and it makes a sound or vibrates during testing that causes a distraction to others, faculty may make a verbal announcement in the testing room for the owner to claim responsibility for their device and to silence them to prevent further distractions. Use of any prohibited items will result in confiscation of both the test and items used.

- Hats, sunglasses, food or beverages of any kind, personal items of any kind, may not be in the immediate testing environment.
- Only head coverings of religious nature will be allowed in testing setting.
- Calculators, language translators, textbooks, notes, and/or crib sheets are considered restricted items and may only be used with instructor permission. To ensure test security and the integrity of the exam being administered, faculty or assigned proctors have the authority to inspect any restricted items before allowing its use during a test. Restricted items may also be inspected at other times when necessary.

Testing behaviors:

- Communication with other students is prohibited: Communicating with or collaborating with other students before, during, or after a test is a violation of academic integrity.
- Any attempt to share or receive test content before during or after testing will be treated as a grievous breach of the Honor Code.
- Disruptive personal noise may be addressed by faculty.
- It is the students' responsibility to keep track of their own time limits unless the instructor specifies otherwise. Faculty are not required but may "provide 5 or 10-minute warnings"
- Testing accommodations can only be provided as requested by the Office of Disability Resources within the Academic Center.

Test day procedures for students to take tests:

- Student **MUST** be prepared to begin exam at scheduled time, including classroom and computer preparation.
- If you are not prepared to begin the exam at scheduled time, you will not be permitted to test. We will make absolutely NO exceptions to this policy.
- Students should position themselves as instructed by faculty to ensure the best possible test security.
- Students are required to comply with instructions and requests before during and after the examination
- Please use the restroom before or after your test. If it is necessary to use the restroom during a test, the student must obtain faculty/proctor approval before leaving their seat. Please note that frequent restroom breaks may be considered a test irregularity. If any student leaves their seat to go to the restroom without proctor approval, the test will be removed.

Pre-Test Analysis:

The course faculty will submit all exams to a second designated faculty for review prior to administration to a class. The designated second faculty will review the exam and return to the original faculty member, allowing time for revisions as necessary.

Post-Test Analysis:

The course faculty will review the statistical analysis of individual test items as well as other test statistics prior to posting test grades. All questions for which 50% or more of the class scored

incorrectly will be reviewed. Decisions to exclude or keep a test item are made by the course faculty.

Test Reviews:

Examinations will be reviewed at the instructor's discretion. Students who wish to discuss a question must see the faculty responsible for the course within 3 days after the examination grade is posted or after test review is conducted.

Dosage Calculation Exam:

Successful completion of a Dosage calculation exam is required to assure safety of medication administration in the clinical setting. Students must achieve a grade of 90% or higher on dosage calculation exams each semester. The date of the exam will be listed on a course calendar. Students have two attempts to obtain the required score of 90% or higher. Students are strongly encouraged to review their first exam attempt under faculty supervision. If the student is unsuccessful on the first attempt or misses the first attempt due to non-emergent reasons, the student will be required to complete a self-directed remediation process. If the student is unsuccessful on, or does not take the second attempt, a clinical failure will result.

Standardize Testing:

Health Education Systems, Inc. (HESI) standardized testing will be used throughout the nursing program as a measure of program outcomes and student evaluation (see individual course syllabi). Costs for these tests are included in nursing student fees. These tests provide experience with standardized testing similar to the National Council Licensure Examination for Registered Nurses (NCLEX-RN) and assist the student to assess her own proficiency in the material tested.

Mid-curricular Examination:

Students will take a nationally-standardized examination near the end of the first year of the program of study. The purpose of this examination is to assure that students are well-prepared for the final year of study. The examination will identify areas of the curriculum that need further study. This will allow the students to focus additional study in areas in which they did not perform well. The results of this examination will also be used by the nursing program faculty to evaluate the effectiveness of the curriculum. Students who do not pass this examination must complete remedial work and be retested. A specific remedial program will be provided to the student. The student may also receive tutorial assistance from the Academic Success Center.

Additional Nursing Graduation Testing Requirement:

As part of the graduation requirement, the nursing student is required to pass an Exit Exam (HESI RN Exit) in NUR 415. Students will have only TWO attempts to pass the Exit Exam with a score of at least 850 during the semester.

If the student is not successful at 850 or greater on the first attempt, he/she must meet with the course coordinator to analyze category scores, evaluate test taking strategies and develop a plan of remediation. The remediation plan will consist of viewing content videos and successful completion HESI remediation and / or HURST review material. Additional NCLEX questions may also be required based on student Predictor results and course coordinator discretion.

During the final exam period for NUR 415 and after the remediation plan is completed, the student will be allowed a second attempt to successfully pass the Exit Exam (HESI RN Exit). If the student is not successful with a score of 850 or greater on the second attempt, he/she must take a one hour independent study course to assist with NCLEX preparation. This independent study will be at the student's expense.

After the independent study is completed, the student will be allowed a third attempt to pass the Exit Exam. If the student is not successful at 850 or greater on the third attempt, he/she must repeat the independent study course a second time at his/her own expense. This cycle will continue until the student is successful on the Exit Exam at 850 or greater.

The required Georgia Board of Nursing paperwork will not be submitted by the School of Nursing until the Exit Exam has been successfully passed at 850.

Consequences:

Failure to follow the guidelines outlined in this policy may result in a grade of zero on the test in question, referral to Wesleyan Honor Council or dismissal from the program without the option to reapply.

Appendix B

Policy A-1	Effective 8/14 Reviewed: 8/16	Approval: Nursing Faculty
------------	----------------------------------	---------------------------

Subject: Attendance

Scope: All Wesleyan College Division of Nursing Students and Faculty

Purpose

Class attendance is important for successful achievement in college. Attendance is mandatory for all nursing classes. It is critical that students recognize that class content and structure are important in the mastery of knowledge and skills in the professional role of nursing. This policy outlines expected attendance behaviors within the Division of Nursing. Students are expected to attend all scheduled classes in courses offered within the Division of Nursing. Students are expected to attend all planned clinical, laboratory, and practicum experiences and to satisfactorily achieve the identified clinical behaviors.

General Information

Official excused absences are those that occur when students are representing the institution or are on College-sponsored trips (including athletics, field trips or other official travel). Student absences are those that occur for, religious obligations or jury duty. (Federal law states that jury duty and religious obligations constitute excused absences.)

Absences in classroom attendance result in grade reduction. One week of absences will be tolerated per semester (meaning 1 miss for classes meeting once a week, and 2 misses for classes meeting twice a week). Beyond that, each absence will result in the deduction of points from the final grade. Ten point deduction for classes that meet once a week, and 5 point for classes that meet twice a week. Example: If a class meets twice a week and a student misses three class periods, then the student's final grade is reduced by 5 points. If a student had a final grade of 90 in a class with three absences, then their final grade will be 85.

Policy

- Attendance is documented during each class meeting.
- The students must notify instructors as soon as possible in advance of scheduled absences.

- A student is expected to make up work missed. In situations where the academic experience cannot be repeated, an equivalent educational experience cannot be offered, or make-up work is not practical, the issue of class attendance may be resolved through a cooperative effort of the activity sponsor, the student and the instructor.
- Refer to the Testing Policy for absences during testing periods.
- Clinical/ laboratory experiences are mandatory. If an absence is unavoidable:
 - 1. call the assigned clinical unit at least 2 hours prior to the beginning of the shift and leave a message for the clinical instructor or as posted in course syllabus, and
 - 2. call the nursing division office (478-757-5234) and leave a message.
- Failure to properly notify faculty according to guidelines will be reflected in the student's clinical evaluation and may result in the student not meeting the clinical learning objectives, and thus clinical failure for the course.
- Clinical / laboratory make-up experiences may not be possible. Failure to complete all clinical / laboratory hours during the semester will result in a clinical failure or incomplete in course. See college catalogue for incomplete grades.
- Students are required to be in the clinical facilities and ready to work at the assigned time. A student who is more than 5 minutes late may be considered absent and excluded from the day's experience.
- It shall be the responsibility of the primary faculty and/or Program Director, in consultation with the clinical preceptor/agency, to determine the make-up experience, based upon the number of hours missed and the student's progress toward meeting the clinical behaviors. Make-up clinical/practicum experience will be scheduled at the convenience of the clinical preceptor/agency and is NOT guaranteed.
- Individual faculty members maintain the autonomy to mark students absent for late arrivals or early departures as outlined in individual course syllabi.

Consequences

- Failure to complete clinical hours may result in a clinical failure resulting in failure of the course.
- Failure to notify faculty as outlined in this policy may result in forfeiture of the student's right to make up work and/ or clinical time.

Appendix C

Policy S-1	Effective 8/14 Reviewed: 8/16	Approval: Nursing Faculty
------------	----------------------------------	---------------------------

Subject: Social Media Use

Scope: All Wesleyan College Division of Nursing Students and Faculty

Purpose

Wesleyan College Division of Nursing supports the use of social media to reach audiences important to the College such as students, prospective students, faculty and staff. This policy applies to Division of Nursing students and faculty who engage in Internet conversations for school-related purposes or school-related activities such as interactions in or about clinical and didactic course activities. Distribution of sensitive and confidential information is protected under HIPAA and FERPA whether discussed through traditional communication channels or through social media.

General Information

Social media are defined as mechanisms for communication designed to be disseminated through social interaction, created using highly accessible and scalable publishing techniques. Social media is commonly thought of as a group of Internet-based applications that are built on the ideological and technological foundations of the web that allows the creation and exchange of user-generated content. Examples *include but are not limited to* LinkedIn, Wikipedia, Second Life, Flickr, blogs, podcasts, RSS feeds, Allnurses.com, Twitter, Facebook, YouTube, Vine, Snapchat, and Yik Yak.

While this policy may need to be modified as new technologies and social networking tools emerge, the spirit of the policy will remain the protection of sensitive and confidential information. Social media often spans traditional boundaries between professional and personal relationships and thus takes additional vigilance to make sure that one is protecting personal, professional, and college reputations.

As students and faculty, you will want to represent the College and the Division in a fair, accurate and legal manner while protecting the brand and reputation of the institution.

When publishing information on social media sites remain cognizant that information may be public for anyone to see and can be traced back to you as an individual. Since social media typically enables two-way communications with your audience, you have less control about how materials you post will be used by others.

Policy

- Protect confidential, sensitive, and proprietary information: Do not post confidential or proprietary information about the college, staff, students, clinical facilities, patients/clients, or others with whom one has contact in the role of a Wesleyan College Division of Nursing student.
- Respect copyright and fair use. When posting, be mindful of the copyright and intellectual property rights of others and of the college. For guidance, seek consultation through the Division Chair.
- Do not use Wesleyan College Division of Nursing marks, such as logos and graphics, on personal social media sites. Do not use Wesleyan College Division of Nursing name to promote a product, cause, or political party or candidate.
- Do not take or post pictures with any identifiable symbols of a clinical facility including the facility/ hospital badge.
- Use of computers (Laptop computers, Notebooks, etc.) during class shall be restricted to note taking and classroom activities, not social media. Use otherwise is distracting for not only the student involved in the activity but those in the immediate area/vicinity.
- Be aware of your association with Wesleyan College Division of Nursing in online social networks. If you identify yourself as a student, ensure your profile and related content is consistent with how you wish to present yourself to colleagues, clients, and potential employers. Identify your views as your own. When posting your point of view, you should neither claim nor imply you are speaking on Wesleyan College Division of Nursing behalf, unless you are authorized to do so in writing.
- HIPPA guidelines must be followed at all times. Identifiable information concerning clients/clinical rotations must not be posted in any online forum or webpage.
- Ultimately, you have sole responsibility for what you post. Be smart about protecting yourself, your and others privacy, and confidential information.

Procedure/Considerations

- There is no such thing as a “private” social media site. Search engines can turn up posts years after the publication date. Comments can be forwarded or copied. Archival systems save information, including deleted postings. If you feel angry or passionate about a subject, it is wise to delay posting until you are calm and clear-headed. Think twice before posting. If you are unsure about posting something or responding to a comment, ask your faculty. If you are about to publish something that makes you even the slightest bit uncertain, review the suggestions in this policy and seek guidance.
- Employers hold you to a high standard of behavior. By identifying yourself as a Wesleyan College Nursing student or faculty through postings and personal web pages, you are connected to your colleagues, clinical agencies, and even clients/patients. Ensure that content associated with you is consistent with your professional goals.
- Nursing students are preparing for a profession, which provides services to a public that also expects high standards of behavior.
- Adhere to all applicable College privacy and confidentiality policies.

- You are legally liable for what you post on your own site and on the sites of others. Individual bloggers have been held liable for commentary deemed proprietary, copyrighted, defamatory, libelous or obscene (as defined by the courts).
- Employers are increasingly conducting Web searches on job candidates before extending offers. Be sure that what you post today will not come back to haunt you.
- Monitor comments. You can set your site so that you can review and approve comments before they appear. This allows you to respond in a timely way to comments. It also allows you to delete spam comments and to block any individuals who repeatedly post offensive or frivolous comments.
- Do not use ethnic slurs, personal insults, obscenity, pornographic images, or engage in any conduct that would not be acceptable in the professional workplace.
- You are responsible for regularly reviewing the terms of this policy.

Consequences

- Violations of patient/client privacy with an electronic device will be subject to HIPAA procedures/guidelines and consequences.
- Students who share confidential or unprofessional information do so at the risk of disciplinary action. This may include failure in a course and/or dismissal from the program in the case of students.
- Each student is legally responsible for individual postings and may be subject to liability if individual postings are found defamatory, harassing, or in violation of any other applicable law. Students may also be liable if individual postings include confidential or copyrighted information (music, videos, text, etc.).

Reference resources should be used to clarify the nurse's role and responsibilities. Please review the National Council State Boards of Nursing's (NCSBN) White Paper: A Nurse's Guide to Use of Social Media and the American Nurses Association's (ANA) Principles for Social Networking and 6 Tips for Nurses Using Social Media (1/2012).

TO ALL STUDENTS:

Please read your handbook.

Any questions may be directed to the Nursing Division Chair or any member of the nursing faculty.

Signing this sheet indicates that you have read, understand, and agree to comply with the Fall 2018 Nursing Program Student Handbook ,Wesleyan College Student Handbook, and Wesleyan College Catalogue.
